

The Municipality's Award for Architectural and Urban Creativity

About the Award

Stemming from its role of supporting high-quality projects within the region, Riyadh Region Municipality initiated a specialized architectural and urban award named "the Municipality's Award for Architectural and Urban Creativity" for individuals and institutions, to recognize and honor excellence in the built environment.

Award Goals

- Improving the overall quality of projects.
- Promoting excellence among practitioners and celebrating their remarkable projects.
- Raising the level of public awareness of the importance and impact of high-quality design outputs.
- Encouraging positive competition and highlighting best practices delivered by public, private, and non-profit sectors.

Award Categories

- Architecture Award
- Landscape and Urban Design Award

Three winners are awarded under each category (6 winning projects in total)

Accepted Entries

The Prize

Honoring in the awards ceremony

Engraved plaque of the award's logo to be attached on the entrance of the winning project.

Honorary certificate

A detailed description of the project in the award's special publication of all the nominated and winning projects.

Supporting the winning project to compete in regional and international competitions.

Providing a letter of recognition

Award Conditions:

- Entries are only accepted online through the Award's portal <https://award.alriyadh.gov.sa/Register.aspx>
- The project must be existing in Riyadh region and built within the last five years.
- Any of the parties involved with the project (owner, designer, contractor, or developer) could submit an entry. An application by either one of them assumes a consensus amongst them on applying for the award.
- A maximum of five entries are accepted from the same applicant.

Submission Requirements:

- Log into the Award's portal and create a username and password.
- Fill in the project details (land area; project category; the name of the designer, contractor, and owner; proof of the year the project was built; and a Google Maps link to the project).
- Describe the design approach, design philosophy, and the creativity aspect of the project's design (maximum of 250 words).
- Upload the following drawings and photos:
 - Floor Plans
 - Elevations and sections
 - Interior and exterior photos
